PERSONAL PROJECTS

Personal Portfolio ⬏
- This is my personal portfolio project/page designed by using HTML, CSS and JavaScript which represents my personal skills and also the projects I have developed.

Dashboard
- Created by using Bootstrap5, CSS3, React JS. Mainly three points in the Sidebar Section i.e.
- 1. **Dashboard** - Apex-Chart which shows dynamic data related to ToDo.
- 2. **ToDo** - User can Add, Delete, Edit and Save multiple todo data & after cliicking on Checkbox, an email will sent to my gmail. For this, i have used Email.js Library.
- 3. **Settings -** User can see profile and can change the username and password for Login into Dashboard.
- GITHUB LINK

Login-Registration Form
- Created by using Bootstrap and React JS. Setup a local server to handle registration and login requests.
- Used **Axios** library to POST and GET my data. Added validation part, if the user credentials match, it shows Login else Invalid Credentials.
- GITHUB LINK

Weather App ⬏
- Created by using Bootstrap and React Js. Users are allow to search for weather information by city name.
- Used **Axios** library to GET the weather data for that specific location with humidity, pressure, windspeed, temperature and weather conditions.
- GITHUB LINK

TECHNICAL SKILLS

HTML5   CSS3   JavaScript   Git   Bootstrap5

jQuery   ReactJS   JSON   SCSS

Tailwind CSS   ES6   Responsive Design

Figma to HTML
